This has been a milestone year for Blue Ant International. What started small in 2014, has now become a full fledged global content distribution company with bustling offices in London and Toronto.

Our Blue Ant family has also grown, welcoming a wealth of talented and prestigious content creators from NHNZ, Beach House Pictures and Northern Pictures, and we continue to grow our international footprint through our expanding channels business, which now includes the ZooMoo kids network.

At the heart of all of this growth, are the minds and skills of creative storytellers and developers. We continue to nurture relationships with top-tier producers from around the world and have the pleasure of launching another 600+ hours of premium storytelling across multiple genres at this year’s MIPCOM. Our latest offering includes NHNZ’s Orangutan Jungle School and Alibi Entertainment’s Sarah Off The Grid among other marquis properties.

This year also marks a leap into kids & family programming and we will be making our inaugural trip to MIPJunior with an impressive new offering of over 200+ hours in the genre.

As we expand our international presence and delve into more genres, our goal remains the same: to offer our clients the highest quality premium content and deliver best-in-class customer service. With this in mind, our list of clients continues to grow and we are grateful for the opportunity to work with and build relationships with all of you. Thank you!

As our industry changes at a rapid pace and digital disruption continues to make its presence felt, I am reminded that there is no other business quite like show business! The inherent magic in our chosen field and the synergy of parts that come together to create world-class ratings blockbusters, there is nothing else like it.

ARABIAN INFERNO

The parched and barren landscape of the Arabian Peninsula offers a vivid backdrop for life in the harsh desert. Water is scarce and death due to the extreme heat is common, yet a natural world continues to flourish. Follow some of the desert’s most iconic creatures and learn the unique ways in which they’ve adapted to the stark conditions around them.
ANIMAL SENSES

From the earliest primitive life forms to sophisticated animals like mammals, primates and birds, animals have evolved powerful senses to perceive their environment. They have developed senses which can turn mechanical waves, airborne particles, and photons into information that helps animals find food, shelter, mates, and communicate with each other. ANIMAL SENSES traces the evolutionary history of those senses.
Join veteran safari guide Jean Du Plessis as he takes you on an exhilarating trip through the Serengeti with migrating wildebeest.
